-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,2,5,9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what are the four vertices formed by the claimed points of the closed figure, as set forth in claims 1,9 and 10.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Protzeller. Protzeller shows a lifter 55 and legs 9,10.

Claims 1,2 and 9 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Pyle. Pyle shows a lifter 77-79,37.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,5,9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chrisley in view of Rieser. Chrisley shows the claimed hut with the exception of his winch and cable system providing lowering energy to move the platform from a raised position. Riser shows a winch 42 and cable system 60,52 as a means for providing both raising and lowering energy. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Chrisley to comprise a winch and cable system, as taught by Riser, to enable its use to move his platform from a raised position.

Claim 5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Protzeller or Pyle in view of Rieser. Both Protzeller and Pyle show the claimed device with the exception of his winch lifting system. Riser shows a winch at 42 and cable system 60,52 as a means for providing both raising and lowering energy. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify either Protzeller or Pyle, to comprise a winch lifter, as taught by Riser, for raising and lowering their platforms.
